SUMMARY & CAREER OBJECTIVE

As a Frontend Developer, I am highly motivated and inquisitive, always eager to learn more and improve my skills. My background as a Leisure professional has given me a very strong communication skills (both verbal and written) and a high attention to detail. I have transferred these skills into my Web Development to create applications and interfaces that anyone can use with ease.

WORK EXPERIENCE

Oct 2023 - Present
Voyage Guide – *Chingu community*

- Help my Chingu team to develop the MVP and assign tasks to team members.
- Create resources that allowed the team to handle more complex tasks like properly displaying responsive image grids.
- Help troubleshoot and test the project and provide feedback.
- Present lessons on basic frontend security, responsive design and CSS Grid.

Sep 2022 - Present
Coding Teaching Assistant – *Scrimba platform*

- Assist students who are struggling to figure out logic and solutions to their solo projects.
- Design new training projects and courses for students improve their skills.
- Record and edit tutorials for the platform and collaborations with other learning platforms.

Jan 2020 – Present
Freelance Web Developer – *Self-employed*

- Communicate with client on their requirements for the project.
- Mock-up designs for client's approval.
- Implement design ensuring high performance and mobile responsiveness.
- Write documentation for the client once the project is complete.

2009 - 2014
Scuba Diving Instructor – *worldwide*
Qualifications:
- PADI Master Scuba Diver Trainer
- ASSET scuba equipment technician and cylinder tester

COMMISSIONED WORK

Scrimba Interactive Tutorials
Scrimba and FreeCodeCamp

- Took previously written articles and converted them into a series of interactive video tutorials using the Scrimba interactive editor.
- Tutorials were on the topics:
    - [Typescript](#)
    - [Rest APIs in React](#)
    - [HTML tables](#)

Jazz Band Website
Next.js + Typescript + Contentful

- Site for a local Jazz band to help them advertise and get more ticket sales. The Contentful CMS allows the band to add new gigs and new articles, as well as change the site text as much as they like.
- [Deployed site](#)
- [Github repo](#)

Artist Website
Next.js + Typescript + Contentful

- Site for an independent artist to showcase their work and get commissions for their business.
- [Deployed site](#)
- [Github repo](#)

Diving Club Website
Wordpress

- Bespoke Wordpress site complete with custom theme for a local springboard diving club.
- [Deployed site](#)
- [Github repo](#)

PERSONAL PROJECTS

Anime Recommendations
React

- Uses the Jikan API to recommend anime series based on user submitted categories and filters.
- [Deployed site](#)
- [Github repo](#)

Lifeguard Quiz
React

- Quiz app for NPLQ lifeguards to practice for their theory exams. Provides 2 different quiz modes and selects questions based on user filters, then provides feedback on the answers given.
- [Deployed site](#)
- [Github repo](#)

Swimhub API
NodeJS + Express + Typescript

- API that forms the backend of the Swimhub project. The Swimhub project is designed to give Swimming teachers a place to share tips and exercises for their lessons.
- [API Documentation](#)
- [Github repo](#)

BooleBots (Chingu Voyage)
React + Typescript

- Game for teaching people how logic gates work. Users can customise up to 4 bots and have them battle to determine which logic gate wins.
- [Deployed site](#)
- [Github repo](#)
